

JAINIL JOSHI

Data Analyst

Ahmedabad, India • +91 9537111141 • jainiljoshi8653@gmail.com • [LinkedIn](#) • [GitHub](#)

PROFESSIONAL SUMMARY

Data Analyst and full-stack developer with hands-on experience building end-to-end data and web applications using Python, SQL, React.js, and Node.js. Skilled in data cleaning, exploratory data analysis (EDA), Power BI/Excel dashboarding, REST API development, and turning raw data into decision-ready insights. Completed structured Data Analytics training (TOPS Technologies) and shipped multiple production-style projects spanning ESG management, ERP systems, and analytics dashboards. Quick learner with strong analytical, problem-solving, and communication skills.

TECHNICAL SKILLS

- **Programming & Querying:** Python, SQL (MySQL, PostgreSQL, SQLite, SQL Server), JavaScript
- **Data Analysis & Visualization:** Pandas, NumPy, Matplotlib, Plotly, Power BI, Advanced Excel, EDA, Dashboard Development
- **Data Analysis Techniques:** Statistical & Trend Analysis, Data Cleaning & Wrangling, Correlation Analysis, KPI Tracking, Ad-hoc Business Reporting & Data Storytelling
- **Tools & Platforms:** Git, GitHub, VS Code, Cursor, Antigravity, ChatGPT, Claude, GitHub Copilot, Gemini

PROJECTS

Ecosphere — ESG Management Platform

GitHub: <https://github.com/jainil282004/ecosphere> | Live: <https://ecosphere-web.vercel.app/login>

- Built an enterprise ESG (Environmental, Social & Governance) management platform using React.js, Express.js, and PostgreSQL.
- Implemented JWT-based authentication and role-based access control (RBAC), backed by interactive analytics dashboards for ESG reporting.

DecorFlow-AI — ERP Platform for Event & Decoration Businesses

GitHub: <https://github.com/jainil282004/decorflow-ai> | Live: <https://decorflow-8q3p.onrender.com/login>

- Developed a scalable ERP platform (React.js, Node.js, Express.js, MongoDB, Tailwind CSS) covering the full event lifecycle — lead management, quotations/invoicing, bookings, inventory, vendors, staff, and payments.
- Implemented JWT authentication, role-based dashboards, RESTful APIs, and business analytics/reporting using modular architecture and Git-based version control.

StockSeer — Stock Market Analytics Dashboard

- Built a Flask + SQLite web application analyzing historical price data across US and Indian equity markets, with engineered features to surface trends and patterns.
- Implemented walk-forward backtesting logic and an interactive Plotly dashboard for visualizing performance and market signals over time.

Additional builds: UrbanEye Enterprise (municipal property-violation intelligence dashboard) and a Forex market analytics platform (live pricing, technical/news analysis, backtesting).

HACKATHON EXPERIENCE

Hackathon Participant — Ecosphere Hackathon 2026 | Ahmedabad, 07/2026

GitHub: <https://github.com/jainil282004/ecosphere>

- Collaborated within a development team to design a sustainability-focused solution, implementing frontend features, integrating APIs, and using Git/GitHub for agile version control; presented the final solution to judges.

CERTIFICATIONS

- **AI Prompting for Everyone** — [DeepLearning.AI](#) | Sep 2026 [Verify](#)
- **Data Analytics Job Simulation** — [Deloitte \(via Forage\)](#) | Jul 2025
- **Data Analysis Training Program** — [TOPS Technologies](#)

EDUCATION

Bachelor of Arts (B.A.) | Bhavan's Arts and Commerce College, Ahmedabad | 06/2022 – 04/2025

Languages: English | Hindi | Gujarati
